

## OPC Server for Siemens CCTV

The software solution allows OPC Clients to control the Siemens Sistoré CCTV System.

With the fully featured driver all relevant data regarding the operating of the cameras, alarms, status inputs and outputs can be shared with the building automation OPC Clients system.

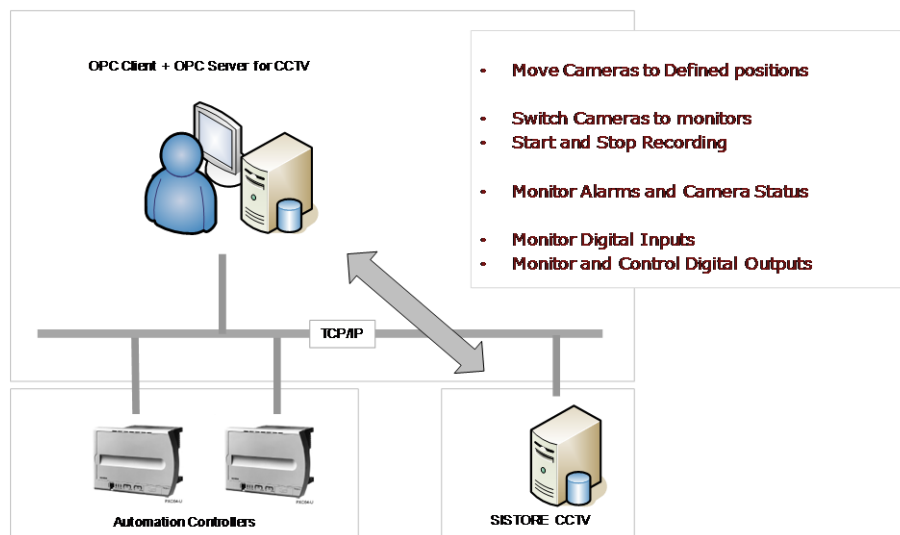

The software driver comes complete with a dynamic event monitor and a simple engineering process.

### Features and functions

#### OPC Server for Siemens Sistoré CCTV

The OPC Server connects to the Siemens Sistoré CCTV.

#### CCTV Interoperation

- Command Cameras to defined positions
- Switch camera streams to monitors
- Monitor Alarm and Camera Status
- Monitor Digital Inputs
- Monitor and Control Digital Outputs
- Start and Stop Recording

#### Engineering

The Software application uses a very efficient engineering process to allow non-CCTV experts to quickly and simply gain interoperation with the Sistoré CCTV Systems and Cameras.
